In this way, we hope to maximize your reimbursement. Our staff is efficient and knowledgeable about insurance matters and you can rely on their expertise.

If you require our surgical skills and feel that a financial burden would be placed upon you, please discuss this with us before surgery to see if we can work out an equitable solution.

**COMPUTER IMAGING DISCALIMER**

Computer imaging may be used to better educate you about your upcoming surgery. Although an approximation of intended results is to be displayed, I realize that there are differences in artistic ability and surgical technique among physicians. I also realize that wound healing is different among different patients which may cause the surgical result to differ fro the imaged result. I recognize that the imaging result does not constitute and should not be construed to be an exact representation of postsurgical results. I understand that it is impossible to guarantee intended results. I understand that the alteration of these images is purely for the purpose of illustration, education and discussion.

I certify my understanding that there is no guarantee (expressed or implied) as to my final surgical result.
